SEMINAR INFORMATION:

Seminar Description:

This Kinesio Taping® Advanced Techniques and Clinical Reasoning course offers a brief review of the basic taping and assessment concepts learned in the first 2 day course. Advanced taping techniques and assessments are presented as Lecture Tutorials to introduce step by step applications for chronic edema, scar and fascial management, nerve taping as well as acute and chronic pain management. Participants will be offered ample lab time to practice each advanced technique guided by the Assessment Flowchart for clinical decision making. Case studies are presented for designing a clinically relevant application within a treatment program guided by the instructor. Case studies are then introduced for small groups of students to practice the variety of assessment techniques and advanced taping applications.
